**DETAILED ACTION*****Informalities***

Claims 1-16 are currently pending and are the subject of this Office Action.

***Election/Restrictions***

Claims 1-7 generic to the following disclosed patentably distinct species: the multitude of compounds that can be formed by the genus of Claims 1-7. The species are independent or distinct because the search required for one compound would not be the same as that required for another. For example, the genus of Claims 1-7 would encompass the following patentably distinct species:

Compound A

or

Compound B

Clearly, the search for Compound A would not result in the identification of Compound B because they do not share core structures that are readily searched together. Thus, the generic claims would pose an undue search burden on the Examiner if the entire genus of the claims were to be searched.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
